

# Velvet Iron — Data Collection & Third-Party SDK Disclosure

Complete technical specification of user data collected, stored, and processed, with all third-party SDK integrations for Google Play & App Store Compliance.

**Application:** Velvet Iron (Training Guide)  
**Category:** Health, Fitness & Gamified Wellness  
**Backend Host:**  
https://velvet.api.softvence.app

**Package / App ID:** com.velvet.velvetiron  
**Framework:** Flutter (iOS & Android)  
**Audit Date:** September 13, 2026

## 1. Summary of Data Collected by Category

### A. Personal Identification & Account Data

| Data Element   | Description / Code Key                     | Storage Location                | Transmission                       |
|----------------|--------------------------------------------|---------------------------------|------------------------------------|
| Full Name      | User's display name (name)                 | Local<br>SharedPreferences      | Velvet Iron Backend API            |
| Email Address  | Contact & login email (email)              | Local<br>SharedPreferences      | Backend API & Firebase Auth        |
| Username       | Public username handle (username)          | Local<br>SharedPreferences      | Velvet Iron Backend API            |
| Password       | Account password (Registration/Login)      | Not stored locally in plaintext | Encrypted HTTPS transit to Backend |
| Profile Avatar | User profile picture or selected companion | Local cache                     | Velvet Iron Backend API            |
| User ID        | Unique user identifier (userId)            | Local<br>SharedPreferences      | Backend API & RevenueCat           |
| Auth Tokens    | JWT access_token & refresh_token           | Local<br>SharedPreferences      | HTTPS Authorization headers        |

### B. Health, Fitness & Medical Information Sensitive

| Data Category         | Scope & Data Items                                                                                                                                                                                | Purpose & Usage                                                                          |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|
| Medication Management | <ul style="list-style-type: none"><li>Medication names &amp; dosages</li><li>Prescribed schedule times</li><li>Intake logs (doses taken / missed)</li><li>Historical compliance records</li></ul> | Core feature: Reminds users to take medications on time and tracks historical adherence. |

| Data Category         | Scope & Data Items                                                                                                                                                   | Purpose & Usage                                                                                        |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| Body Weight & Metrics | <ul style="list-style-type: none"><li>Weight log entries</li><li>Weekly weight tracking charts</li><li>Historical weight log trends</li></ul>                        | Core feature: Progress monitoring towards personal fitness and wellness goals.                         |
| Fitness & Exercise    | <ul style="list-style-type: none"><li>Exercise workout routines &amp; types</li><li>Exercise schedules &amp; completion status</li><li>User fitness goals</li></ul>  | Core feature: Planning workouts, tracking physical exercise, and awarding XP for completed activities. |
| Nutrition & Diet      | <ul style="list-style-type: none"><li>Daily meal logs &amp; schedules</li><li>Foods consumed</li><li>Macronutrient targets (Protein, Carbs, Fat, Calories)</li></ul> | Core feature: Monitoring nutritional habits and balancing daily macronutrient targets.                 |
| Mental Well-Being     | <ul style="list-style-type: none"><li>Daily mood entries &amp; ratings</li><li>Historical mood trends</li></ul>                                                      | Core feature: Reflective emotional wellness tracking paired with daily habits.                         |

**Health Data Protection Commitment:** Health, medication, and dietary records are strictly used for in-app user functionality. They are never sold, rented, or shared with advertising networks, insurance providers, or data brokers.

C. Photos, Media & Device Sensors

| Hardware / Data | Permissions & SDKs                    | Purpose & Handling                                                                                                                                                                                                        |
|-----------------|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Device Camera   | CAMERA<br>mobile_scanner, camera      | <ul style="list-style-type: none"><li>Real-time QR code scanning (processed on-device in memory; not recorded).</li><li>Taking photos of medication ("logshots"), meals, or profile pictures upon user request.</li></ul> |
| Photo Gallery   | READ_EXTERNAL_STORAGE<br>image_picker | Used only when the user voluntarily selects an image from their gallery to upload as a profile picture or log attachment.                                                                                                 |

D. Financial & Subscription Data

| Item                       | Entities Involved                        | Scope & Security                                                                                                                       |
|----------------------------|------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| In-App Subscriptions       | RevenueCat, Google Play, Apple App Store | <ul style="list-style-type: none"><li>Monthly Plan: \$14.99/mo</li><li>Annual Plan: \$119.99/yr</li><li>Entitlement: premium</li></ul> |
| Purchase Metadata          | RevenueCat SDK (purchases_flutter)       | Transaction ID, purchase date, expiration date, renewal status, store receipt validation.                                              |
| Credit Card / Banking Data | Google Play & Apple Store ONLY           | <b>NOT COLLECTED OR SEEN BY VELVET IRON.</b> All payment processing is securely handled by Apple and Google.                           |

## 2. Complete List of Third-Party Services & SDKs

### 1. RevenueCat (purchases\_flutter: ^10.12.0) Payments

Provider: RevenueCat, Inc. | Privacy Policy: <https://www.revenuecat.com/privacy/>

- **Purpose:** Managing in-app subscriptions, validating receipts, managing active premium entitlements, and syncing renewal states.
- **Data Shared:** User app ID (backend userId), store receipt tokens, purchase timestamps, product IDs (velvet\_iron\_monthly, velvet\_iron\_annual), device OS version.

### 2. Google Firebase Core & Auth (firebase\_core: ^4.6.0, firebase\_auth: ^6.2.0)

Authentication

Provider: Google LLC | Privacy Policy: <https://firebase.google.com/support/privacy>

- **Purpose:** Cloud infrastructure, token management, and authentication bridge for Google Sign-In.
- **Data Shared:** Google UID, email address, display name, IP address, device telemetry.

### 3. Google Sign-In SDK (google\_sign\_in: ^7.2.0) Single Sign-On

Provider: Google LLC | Privacy Policy: <https://policies.google.com/privacy>

- **Purpose:** Enables users to register and log in quickly with their Google accounts.
- **Data Shared:** User's Google name, email, profile photo URL, and OAuth2 authorization token.

### 4. Google Play Billing & Apple StoreKit Payment Processing

Providers: Google LLC & Apple Inc.

- **Purpose:** Processing in-app subscription payments.
- **Data Shared:** Financial payment details, store account credentials, and transaction tokens (handled exclusively in native store dialogs).

### 5. Discord OAuth2 API (app\_links: ^6.3.2, url\_launcher: ^6.3.2) Social / Community

Provider: Discord Inc. | Privacy Policy: <https://discord.com/privacy>

- **Purpose:** Optional Discord account connection and joining the Velvet Iron Discord community.
- **Data Shared:** Discord User ID, username, avatar, and OAuth2 access token returned via deep link scheme velvetapp://auth/discord.

## 6. Google Fonts (google\_fonts: ^6.3.3) Typography

Provider: Google LLC | Privacy Policy: <https://policies.google.com/privacy>

- **Purpose:** Rendering brand typography across app screens.
- **Data Shared:** Device IP address and HTTP User-Agent when downloading font assets from Google servers.

## 7. Google ML Kit / Mobile Scanner & Camera (mobile\_scanner: ^5.1.0, camera: ^0.10.5+5)

Device Vision

Provider: Google LLC & Flutter Community

- **Purpose:** On-device QR code scanning and camera photo capturing.
- **Data Shared:** Real-time camera frames are analyzed entirely on-device; no camera streams or unscanned frames leave the device.

## 8. Velvet Iron Backend Server (https://velvet.api.softvence.app) Primary API

Host: Softvence App Infrastructure

- **Purpose:** Primary database and business logic server storing user profiles, health logs, medication schedules, workout history, macro goals, and gamification state.
- **Data Shared:** All user-created profile information and health tracking logs.

# 3. Google Play Console "Data Safety" Section Answers

When completing the **Data Safety Form** in the Google Play Console, use these verified responses:

| Data Safety Category              | Collected?     | Shared?           | Purposes to Select in Console                           |
|-----------------------------------|----------------|-------------------|---------------------------------------------------------|
| Personal Info → Name              | Yes            | No                | App functionality, Account management, Personalization  |
| Personal Info → Email             | Yes            | Yes (Firebase/RC) | App functionality, Account management, Authentication   |
| Personal Info → User IDs          | Yes            | Yes (Firebase/RC) | App functionality, Account management, Analytics        |
| Health & Fitness → Fitness info   | Yes            | No                | App functionality (Exercise logs, workout schedules)    |
| Health & Fitness → Health info    | Yes            | No                | App functionality (Medication records, weight tracking) |
| Financial Info → Purchase history | Yes            | Yes (RevenueCat)  | App functionality, Subscription management              |
| Photos & Videos → Photos          | Yes (Optional) | No                | App functionality (Avatar, medication logshots)         |

| Data Safety Category              | Collected? | Shared? | Purposes to Select in Console                      |
|-----------------------------------|------------|---------|----------------------------------------------------|
| App Activity → Other user content | Yes        | No      | App functionality (Mood logs, meal logs, feedback) |

Data Security Declarations

- **Is data encrypted in transit? → Yes** (All network requests enforce HTTPS/TLS 1.3).
- **Do you provide a way for users to request data deletion? → Yes** (Users can delete their account and data in Settings or by contacting support).
